Professional Summary

First-semester Computer Science student interested in systems engineering, Linux infrastructure, DevOps, and backend systems. Exploring containerization, deployment, system architecture, and software internals through independent development and collaborative projects. Seeking an internship to contribute to infrastructure and systems-focused engineering work while strengthening core computer science fundamentals.

Technical Skills

Operating Systems: Linux, command-line tools, basic process and memory concepts
Infrastructure & DevOps: Docker, containerization fundamentals, deployment workflows, environment configuration, basic service orchestration concepts
Version Control: Git, GitHub, branching, commits, repository management
Systems Fundamentals: Client-server architecture, processes, networking basics, HTTP, APIs, queues, databases, caching, modular architecture, basic scalability and fault-tolerance concepts
Programming: Python, C (currently learning)

Projects

Spreadsheet Engine GitHub Repository
Independent Software Project

- Developed a spreadsheet engine featuring cell storage, formula evaluation, and dependency tracking.
- Used Python's Abstract Syntax Tree (AST) module for formula evaluation and implemented circular-reference detection.
- Implemented recalculation logic and JSON/CSV persistence for spreadsheet data.

CYBERGUARD GitHub Repository
Collaborative Hackathon Project | System Architecture & DevOps

- Contributed to the system architecture and DevOps of a threat-intelligence platform featuring a URL analyzer that locally screens URLs against a dataset of 2M+ records.
- Worked on the architecture and local deployment of a multi-model pipeline integrating Laya, a decision-oriented model, with Qwen 8B for natural-language contextual analysis.
- Configured Cloudflare Tunnel to expose the locally hosted application, enabling remote access while the system ran on a laptop with 16 GB RAM and 6 GB VRAM.
- Contributed to the design of a risk-analysis workflow separating structured risk decisions from LLM-generated explanations.

Education

[Computer science] *[First year of graduation]*
Gandhi Institute for Education and Technology Baniatangi, Bhubaneswar, Odisha
First Semester
